The **Dale ACE Connector**[®] can be used for in-line feeding, suctioning, irrigation, gastric residuals and medication delivery.

Dale[®]
Always Better

The image shows a close-up of the Dale ACE Connector, a teal-colored medical device. It features a central vertical tube with a handle on the left side that can be rotated to control fluid flow. At the top, there are two ports for connecting tubes. The device is designed to be compact and secure, minimizing leaks and protecting patients from contamination.

ACE Connector®

WHEN YOU NEED A SIMPLE, EASY, & SECURE CONNECTION BETWEEN NG TUBES, PEG, PEJ, BRT, G-J TUBES, & FEEDING SETS OR SUCTION.

The Dale ACE Connector (Access Controller for Enteral) minimizes the chance of messy leaks and protects you from potentially infectious splashback while shielding your patients from external contamination. The Dale ACE Connector controls fluid flow into and out of most NG, feeding tubes, and other enteral tubes such as; Nasoenteric, Salem Sump®, Levin, PEG*, PEJ*, BRTs*, and most G-J tubes* and therefore replaces the need for 5-in-1 connectors and enteral feeding Y-port adapters.

*18FR and higher

- A convenient, compact device for controlling fluid flow into or out of an NG tube.
- Remains closed to the atmosphere at all times for optimal infection protection when connected.
- Long-lasting silicone adapter, preassembled in package
- Can be used as a replacement for a Y connector on a PEG or PEJ tube, or it can be used in conjunction with Y connectors on Feeding tubes in which the Y Connector is not removable.
- Replaces 5-in-1 connectors.
- Protects the clinician from exposure to potentially infectious gastric fluids by eliminating the need to disconnect the device when feeding, suctioning, irrigating, delivering medication, or withdrawing gastric residuals.
- Reduces risk of cross contamination, eliminates mess and formula loss by maintaining a closed system (no disconnect).
- Has a simple ON/OFF handle versus a confusing free spinning stopcock to control fluid flow.
- Has a built in Needleless Syringe Port Seal – accepts most catheter tip 60cc syringes.
- Designed to physically prevent the administration of enteral formula into an I.V. line.
- Incompatible with luer connectors.
- Meets ANSI/AAMI ID 54:1996/(R)2012
- DEHP Free
- Not made with natural rubber latex.

ORDERING INFORMATION

Product Number	Size	Quantity
475	Dale ACE Connector	50 per box
485	Dale ACE Connector with ENFit Connection	50 per box

US Patent #6,165,168 & 8,353,895
